### **Worms in School reporting form**

Thank you for incorporating vermiculture into your curriculum! The Composting Association of Vermont, Extension Master Gardener's and Gardeners' Supply Company are excited to support your composting, soils, biology, and environmental education activities. We hope you have a great time engaging students in science and environmental learning with worms in your classroom! Please use this form to tell us about how you are incorporating vermicomposting and worms in your curriculum. Please send an update at the end of year 1, 2, & 4 following the Worms in School workshop. If there is no change from the prior year's report indicate 'no change' in response to the first question. Send the form to [info@compostingvermont.org](mailto:info@compostingvermont.org). Thank you!

School Name/location:

Grade:

Teacher's Name:

Phone:

Email:

*(Use as much space as you want to answer the questions)*

How are you using the worms/worm bin in your curriculum?

Have you had any problems managing the bin and the worms? If so, what were they? How were they resolved?

What are the most valuable aspects of having a worm bin in your classroom?

As your worms reproduce, what are you doing with extra worms? Eg. giving worms to other schools, students take home to start vermicomposting, give to other classes to start vermicomposting.

Please attach no more than 3 photos of students working with the worms. Make sure any students in photos have been cleared with photo releases. Please add any other thoughts or anecdotes that will help us expand this program.

Send your updates in year 1, 2, & 4 after the workshop to [info@compostingvermont.org](mailto:info@compostingvermont.org). Please send your updates by April 1 of each reporting year.

***Thank you!***
